

Discover the MACRO world!

90mm f/2.5 1.25:1 Larger-than-Lifesize

- The world's one and only 1.25× True Macro Lens for almost any SLR camera of autofocus and manual, via T/T2 mount adapter.
- The lens can be used in a regular focusing range to infinity.
- Optically and mechanically same as the original 1.25× automataic model which enjoyed such reputation as follows:

"As a last word, it might be worth saying that this is probably the best macro lens I have ever used."

-David Kilpatrick, Photon, August '97

"Its unique in its wide magnification range and super-solid construction. We were highly pleased with all results."

-Herbert Keppler
Popular Photography,
August '97

"It's an excellent optic for nature work,...With this lens you can fill the frame with a subject no larger than your fingernail one moment, then focus on a landscape in the distance the next: a versatile lens."

-Colin Vendall
Photo Technique, January 1998

Universal Micro Focus Adjuster
A must for critical focusing & framing

"For macro specialist, it must be the Elicar."

-Staewart Bell Amateur Photographer 25 October, 1997

In 1997, the Elicar MS-2 Camera incorporating with 90mm f/2.5 1.25× Super Macro Lens in PK mount was awarded "A Historical Camera of the Year" and is being displayed at JCII Camera Museum in Tokyo, Japan.
